PERSONAL PROJECTS

1. Attendance Management System by Face
Using Python, Visual Studio Code, MySQL Workbench
To make the attendance process easy. The system will capture the images of the student or employees and using face recognition algorithm, mark the attendance in a excel sheet. I Developed the Front end of the project.

2. Project Management System   Link
Using Adobe Cold-Fusion, MySQL
Created this website to easily handle the projects. Users can register and after logged-in they can add projects with start date and end date with description. They can also edit it and delete.

3. Simple Website For Banking Use   Link
Using HTML, CSS, JavaScript
I have created this site for my brother's use. He needs to print out the passbook for his Bank. Here using this site he easily prints the passbook by filling all the customer details.

4. Weather Forecast   Link
Using HTML, CSS, JavaScript
Simple Weather Forecast website where anyone can search any location and get the current exact location temperature with date.

5. Online Movie Rating   Link
Using Spring Boot
This Project specially designed for Movie Lovers to review the Movie. Includes user authentication and authorization functionality to ensure that only authorized users can access and modify reviews with Role based authentication and Spring Security.
